SUMMARY

Software Engineer specializing in Python backend development, scripting & automation, Linux systems administration, and DevOps. Full-stack capable with end-to-end project ownership from design and development through deployment and long-term maintenance. Shipped and actively maintains 12+ projects with over 7,000+ combined downloads. Actively practices application security through bug bounty programs on HackerOne and Bugcrowd, with multiple accepted vulnerability reports.

EDUCATION

Daffodil International University

Bachelor of Science in Computer Science & Engineering

• CGPA: 3.75 / 4.0

Sep 2022 – Aug 2026

Dhaka, Bangladesh

Sirajganj Government College

Higher Secondary Certificate (HSC) — Science

• GPA: 5.0 / 5.0

Jun 2019 – Dec 2021

Sirajganj, Bangladesh

Dhangora Model High School

Secondary School Certificate (SSC) — Science

• GPA: 5.0 / 5.0 · Awarded Merit-based Scholarship

Jan 2014 – Feb 2019

Sirajganj, Bangladesh

TECHNICAL SKILLS

Languages: Python, Go, JavaScript, TypeScript, Bash

Backend & APIs: Django, Django REST Framework (DRF), Flask, REST APIs, Celery

Databases: PostgreSQL, MySQL, Redis, Database Design

Automation & Scripting: Python Automation, Shell Scripting, Cron Jobs

Linux: Ubuntu, CentOS/RHEL, SSH, Nginx, System Hardening

Cloud & DevOps: AWS (EC2, S3, RDS, IAM, VPC), Docker, GitHub Actions, GitLab CI/CD

Networking & Security: TCP/IP, DNS, SSL/TLS, Firewalls, OWASP Top 10

Version Control: Git, GitHub, GitLab

PROJECTS

Advanced PDF Export — Obsidian Plugin

TypeScript, JavaScript, CSS, Obsidian API, Electron, GitHub Actions

2026 – Present

[\[🔗\]](#) [\[🌐\]](#)

- Developed a full-featured Obsidian plugin for exporting notes as pixel-perfect PDFs with six style presets, a live preview panel, manual page breaks, and granular layout control; listed in the official Obsidian community plugin directory
- Leveraged Electron's print pipeline for precise rendering; automated multi-platform releases via GitHub Actions with versioned changelogs

Obsidian Community · 3000+ installs · 45 GitHub stars

ghurtejai — Tour Planning & Experience Sharing Platform

Python, Django REST Framework, Flutter, PostgreSQL, Redis, Celery, Cloudflare R2, Docker, Nginx

2026

[\[🔗\]](#)

- Built a full-stack travel platform for Bangladesh: Django REST Framework API with modular apps (accounts, destinations, experiences, interactions, moderation), PostgreSQL, Redis caching, and Celery for async task processing; Flutter mobile frontend with feature-based architecture
- Implemented JWT auth, role-based access control (guest / user / moderator / admin), soft-delete, content moderation workflow, voting, bookmarks, nested comments, full-text search, and 20+ REST endpoint groups; Docker Compose + Nginx for dev and production, Cloudflare R2 for media

dash-dash-dash — Minimal Self-hosted Dashboard

Go, REST APIs, Docker, Docker Compose, GitHub Actions, GHCR

2026

[\[🔗\]](#)

- Go HTTP backend exposing modular REST API endpoints for service monitoring, RSS aggregation, web scraping, weather, bookmarks, and to-do; containerized and distributed via Docker and GHCR
- GitHub Actions pipeline builds and pushes multi-arch images on every release tag; ships with Docker Compose and Podman Quadlet configs, hot-reload config, and environment variable injection — deployable in under 5 minutes

Brain Tumor Detection — MRI Classification Web App

Python, Flask, Keras, WSGI, Render

2025

- Flask web app accepting MRI image uploads and returning a tumor classification (glioma, meningioma, pituitary, or no tumor) with confidence score; trained and integrated a Keras model, session-based scan history with no server-side storage, and deployed live on Render with a WSGI production setup

Window Title Reborn — KDE Plasma 6 Widget

QML, JavaScript, KDE Frameworks 6

2025 – Present

- Panel widget for KDE Plasma 6.6+ displaying the active window's title and icon with 5 sizing modes, regex-based app name substitutions, and configurable click behaviors; packaged as a .plasmoid installable directly from the Plasma widget manager via OCS

KDE Store · 2000+ downloads · Rated 5.0 · 8 GitHub stars

Bug Bounty Security Toolkit — GetParamURLs & xssSick

Python, Bash

2023

- **GetParamURLs** chains historical URL archives (gau, waybackurls, waymore), active crawlers (katana, gospider), and JS endpoint extraction (LinkFinder) into a deduplicated, scanner-ready GET/POST URL list
- **xssSick** then probes each parameter across 5 injection contexts (HTML body, attributes, script blocks, JSON, headers) with blind payloads and structured JSON output — both used together in active bug bounty recon and scanning pipelines

WordGlance — Firefox extension for instant dictionary & translation lookups (40+ languages)

JavaScript, WebExtension API, Firefox AMO

2025 – Present

Firefox AMO · 38+ active users · Rated 4.0 · 2 GitHub stars

Pinterest Full — Userscript that extracts full-resolution Pinterest images without login

JavaScript, Userscript API, GreasyFork

2025 – Present

GreasyFork · 700+ installs · 12 GitHub stars

ACHIEVEMENTS

Bug Bounty — \$600+ in Earnings

HackerOne & Bugcrowd

2023 – Present

- Discovered and responsibly disclosed multiple OWASP Top 10 vulnerabilities across HackerOne and Bugcrowd

Merit-based Scholarship — SSC

Board of Education, Bangladesh

2019

Merit-based Talent Pool Scholarship — PSC

Board of Education, Bangladesh

2013

4th Place — Google Hacking Contest

Daffodil International University

2024

Finalist — Unlock the Algorithm Contest

Daffodil International University

2024

Finalist — Take Off Programming Contest

Daffodil International University

2022

EXTRACURRICULARS

Member — Cyber Security Club

Daffodil International University

2023 – 2024

- Participated in CTF challenges, workshops, and security discussions; applied learnings to real-world bug bounty participation and building open-source security tooling

Member — IoT and Embedded Systems Lab

Daffodil International University

2022 – 2023

- Worked with Arduino and ESP32 microcontrollers on embedded systems projects, building practical hardware-software integration skills
