SUMMARY

Software engineer with hands-on experience across Python backend development (Django, Flask, REST APIs), Linux administration, containerization, and CI/CD and comfortable working across the full stack, from designing APIs and configuring Nginx to setting up Docker deployments and automating release pipelines.

Delivered and maintained 12+ end-to-end projects with 4,000+ combined downloads, owning the full lifecycle from design and implementation to deployment, community support, and ongoing maintenance. Also active in application security through bug bounty hunting, earning \$600+ via HackerOne and Bugcrowd.

TECHNICAL SKILLS

- **Languages:** Python, Go, JavaScript, TypeScript, Bash
- **Backend & APIs:** Django, Django REST Framework, Flask, REST API Design, Celery, Redis
- **Databases:** PostgreSQL, MySQL, Database Design, Migrations
- **Automation & Scripting:** Python Automation, Shell Scripting, Cron Jobs
- **Linux:** Ubuntu, CentOS/RHEL, SSH, Nginx, System Hardening
- **Cloud & DevOps:** AWS (EC2, S3, RDS, IAM, VPC), Docker, Podman, GitHub Actions, GitLab CI/CD
- **Networking & Security:** TCP/IP, DNS, SSL/TLS, Firewalls, OWASP Top 10, Web Application Security
- **Version Control:** Git, GitHub, GitLab

PROJECTS

- **Advanced PDF Export — Obsidian Plugin** 2026 – Present
TypeScript, JavaScript, CSS, Obsidian API, Electron, GitHub Actions [\[🔗\]](#) [\[🌐\]](#)
 - Developed a full-featured Obsidian plugin for exporting notes as pixel-perfect PDFs with six style presets, a live preview panel, manual page breaks, and granular layout control; listed in the official Obsidian community plugin directory
 - Leveraged Electron's print pipeline for precise rendering; automated multi-platform releases via GitHub Actions with versioned changelogs*Obsidian Community · 2000+ installs · 40 GitHub stars*
- **ghurtejai — Tour Planning & Experience Sharing Platform** 2026
Python, Django REST Framework, Flutter, PostgreSQL, Redis, Celery, Cloudflare R2, Docker, Nginx [\[🔗\]](#)
 - Built a full-stack travel platform for Bangladesh: Django REST Framework API with modular apps (accounts, destinations, experiences, interactions, moderation), PostgreSQL, Redis caching, and Celery for async task processing; Flutter mobile frontend with feature-based architecture
 - Implemented JWT auth, role-based access control (guest / user / moderator / admin), soft-delete, content moderation workflow, voting, bookmarks, nested comments, full-text search, and 20+ REST endpoint groups; Docker Compose + Nginx for dev and production, Cloudflare R2 for media
- **dash-dash-dash — Minimal Self-hosted Dashboard** 2026
Go, REST APIs, Docker, Docker Compose, GitHub Actions, GHCR [\[🔗\]](#)
 - Go HTTP backend exposing modular REST API endpoints for service monitoring, RSS aggregation, web scraping, weather, bookmarks, and to-do; containerized and distributed via Docker and GHCR
 - GitHub Actions pipeline builds and pushes multi-arch images on every release tag; ships with Docker Compose and Podman Quadlet configs, hot-reload config, and environment variable injection — deployable in under 5 minutes
- **Brain Tumor Detection — MRI Classification Web App** 2025
Python, Flask, Keras, WSGI, Render [\[🔗\]](#) [\[🌐\]](#)
 - Flask web app accepting MRI image uploads and returning a tumor classification (glioma, meningioma, pituitary, or no tumor) with confidence score; integrated a pre-trained Keras model, session-based scan history with no server-side storage, and deployed live on Render with a WSGI production setup
- **Window Title Reborn — KDE Plasma 6 Widget** 2025 – Present
QML, JavaScript, KDE Frameworks 6 [\[🔗\]](#) [\[🌐\]](#)
 - Panel widget for KDE Plasma 6.6+ displaying the active window's title and icon with 5 sizing modes, regex-based app name substitutions, and configurable click behaviors; packaged as a .plasmoid installable directly from the Plasma widget manager via OCS*KDE Store · 1800+ downloads · Rated 5.0 · 6 GitHub stars*

- **Bug Bounty Security Toolkit — GetParamURLs & xssSick** 2023
Python  
 - GetParamURLs chains historical URL archives (gau, waybackurls, waymore), active crawlers (katana, gospider), and JS endpoint extraction (LinkFinder) into a deduplicated, scanner-ready GET/POST URL list; xssSick then probes each parameter across 5 injection contexts (HTML body, attributes, script blocks, JSON, headers) with blind payloads and structured JSON output — both used together in active bug bounty recon and scanning pipelines
- **WordGlance — Firefox extension for instant dictionary & translation lookups (40+ languages)** 2025 – Present
JavaScript, WebExtension API, Firefox AMO 
Firefox AMO · 38+ active users · Rated 4.0 · 2 GitHub stars
- **Medium Unlocked — Paywall-bypass link injector for Medium & 30+ Medium-powered sites** 2025 – Present
JavaScript, Userscript API, GreasyFork 
GreasyFork · 500+ installs · 39 GitHub stars
- **Pinterest Full — Userscript that extracts full-resolution Pinterest images without login** 2025 – Present
JavaScript, Userscript API, GreasyFork 
GreasyFork · 700+ installs · 11 GitHub stars

EDUCATION

- **Daffodil International University** Sep 2022 – Jun 2026
Bachelor of Science in Computer Science & Engineering Dhaka, Bangladesh
 - CGPA: 3.75 / 4.00
- **Sirajganj Government College** Jun 2019 – Dec 2021
Higher Secondary Certificate (HSC) — Science Sirajganj, Bangladesh
 - GPA: 5.0 / 5.0
- **Dhangora Model High School** Jan 2014 – Feb 2019
Secondary School Certificate (SSC) — Science Sirajganj, Bangladesh
 - GPA: 5.0 / 5.0 · Awarded Merit-based Scholarship

ACHIEVEMENTS

- **Bug Bounty — \$600+ in Earnings** 2022 – Present
HackerOne & Bugcrowd
 - Discovered and responsibly disclosed multiple OWASP Top 10 vulnerabilities across HackerOne and Bugcrowd
- **Merit-based Scholarship — SSC** 2019
Board of Education, Bangladesh
- **Merit-based Talent Pool Scholarship — PSC** 2013
Board of Education, Bangladesh
- **4th Place — Google Hacking Contest** 2024
Daffodil International University
- **Finalist — Unlock the Algorithm Contest** 2024
Daffodil International University
- **Finalist — Take Off Programming Contest** 2022
Daffodil International University

EXTRACURRICULARS

- **Member — Cyber Security Club** 2023 – 2024
Daffodil International University
 - Participated in CTF challenges, workshops, and security discussions; applied learnings to real-world bug bounty participation and building open-source security tooling
- **Member — IoT and Embedded Systems Lab** 2022 – 2023
Daffodil International University
 - Worked with Arduino and ESP32 microcontrollers on embedded systems projects, building practical hardware-software integration skills
